

BRITTANY FORDHAM

SOC Analyst I | Digital Forensics & Incident Response

Laurel, MD • 240-708-0002 • bfordham62@gmail.com • linkedin.com/in/brittanyfordham238 • Clearance: Active Public Trust (Tier 1)

PROFESSIONAL SUMMARY

Security-focused analyst candidate with an active federal Public Trust clearance and nine years of federal enterprise IT experience diagnosing and resolving 100+ daily technical incidents, enforcing encryption and data-transmission standards, and supporting secure system operations across 8 facilities. Currently completing an M.S. in Digital Forensics & Cybersecurity (expected Dec. 2027) and a Google Cybersecurity Professional Certificate, with hands-on lab experience in log analysis, Windows Registry investigation, and disk imaging using Splunk, FTK Imager, and Linux CLI. Seeking to apply this incident-handling background and growing security toolset in a SOC Analyst I role, with a longer-term path into digital forensics and incident response.

EDUCATION

M.S., Digital Forensics & Cybersecurity — University of Maryland Global Campus, Adelphi, MD

Relevant coursework: Digital Forensics Case Management & Reporting, Incident Response, Network Forensics, Cyber Threat Intelligence, Malware Analysis Fundamentals

B.S., Information Technology — Towson University, Towson, MD

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Coursera (In Progress)

DIGITAL FORENSICS PROJECTS & LAB EXPERIENCE

USB Device Forensic Examination

- Conducted a full forensic examination of a USB flash drive image using FTK Imager, following standard evidence-handling procedure.
- Validated evidence integrity pre- and post-examination using MD5 and SHA-256 hashing.
- Performed file signature analysis and timeline reconstruction to surface suspicious and hidden artifacts.
- Authored a structured forensic report documenting methodology, findings, and chain of custody.

Log & Registry Analysis Investigation

- Analyzed system and authentication logs in Splunk and Linux CLI to identify anomalous user activity.
- Examined Windows Registry artifacts to reconstruct user activity and trace program execution.
- Applied incident response methodology to scope a simulated compromise and recommend remediation steps.

PROFESSIONAL EXPERIENCE

Audio/Visual Technician | Department of Veterans Affairs (Contractor), Washington, DC

- Investigate and resolve 100+ daily ServiceNow incidents, diagnosing root cause across networked systems for 10,000+ users at 8 federal sites.
- Enforce federal encryption and data-transmission standards across 50+ networked conferencing systems, ensuring continuous compliance.
- Administer Cisco TMS/VCS platforms and endpoint infrastructure, maintaining 99% uptime and reducing recurring system disruptions.
- Author operational and troubleshooting documentation adopted across 8 facilities, standardizing incident response procedures.
- Train 200+ staff annually on secure use of enterprise systems, reducing technical escalations.

IT Help Desk II | Department of Energy (Contractor), Washington, DC

- Delivered Tier II technical support in a secure federal enterprise environment serving 5,000+ users.
- Implemented McAfee File and Removable Media Protection across enterprise endpoints to strengthen data protection controls.
- Executed secure OS deployments across 200+ workstations in compliance with DOE cybersecurity standards.

- Managed 15–25 weekly SolarWinds tickets, maintaining SLA performance and improving resolution timelines.

TECHNICAL SKILLS

Digital Forensics: FTK Imager, EnCase, Autopsy, Disk Imaging, Hash Verification, File Signature Analysis, Windows Registry Analysis, Timeline Reconstruction, Chain of Custody, Evidence Handling

Security & Analysis: Splunk, Kali Linux, Log Analysis, Incident Response Fundamentals, Threat Intelligence Basics

Operating Systems: Windows, Linux (Kali), macOS

Enterprise & IT Tools: ServiceNow, SolarWinds, Cisco TelePresence/TMS/VCS, Polycom, Microsoft 365, SharePoint
