

BRITTANY FORDHAM

CYBERSECURITY | DIGITAL FORENSICS | INCIDENT RESPONSE

Laurel, MD • 240-708-0002 • bfordham62@gmail.com • linkedin.com/in/brittanyfordham238 • fordbee24.github.io

ACTIVE PUBLIC TRUST (TIER 1)

PROFESSIONAL SUMMARY

Federal IT professional with 9 years of experience supporting secure enterprise environments, including Tier II support and networked AV systems. Graduate-level hands-on experience in digital forensics, log analysis, network traffic analysis, and incident response. Pursuing an M.S. in Digital Forensics & Cybersecurity and transitioning into SOC, incident response, or DFIR.

TECHNICAL SKILLS

Digital Forensics: FTK Imager, Autopsy, EnCase, forensic imaging, hash verification, file signature analysis, timeline reconstruction, Windows Registry/artifacts, chain of custody

Security & Analysis: Splunk, log analysis, MISP, IOC analysis, threat intelligence, incident response fundamentals, Wireshark

Systems: Windows, Linux/Kali, macOS, TCP/IP fundamentals, endpoint troubleshooting, networked systems

Enterprise Tools: ServiceNow, SolarWinds, Cisco TelePresence/TMS/VCS, Polycom, Microsoft 365, SharePoint

PROFESSIONAL EXPERIENCE

Audio/Visual Technician | Department of Veterans

Washington, DC

Affairs (Contractor)

February 2019-Current

- Support enterprise audio/video and video-conferencing operations for 10,000+ users across 8 federal sites and 50+ collaboration spaces, helping maintain approximately 99% system availability.
- Configure, operate, maintain, and troubleshoot Cisco TelePresence, TMS/VCS, Polycom, displays, cameras, microphones, and connected conferencing equipment used for meetings and enterprise communications.
- Diagnose audio, video, endpoint, connectivity, and conferencing failures by isolating hardware, software, configuration, and network-related causes and coordinating advanced issues with appropriate IT teams.
- Perform system checks, testing, and post-resolution validation to confirm conferencing equipment and connected components are functioning properly before returning systems to service.
- Manage high-volume AV incidents and service requests in ServiceNow, documenting technical symptoms, troubleshooting actions, escalations, and final resolutions for continuity and trend analysis.
- Apply federal encryption and secure data-transmission requirements when supporting networked conferencing systems and communications technology.
- Create troubleshooting guides and operational documentation used across 8 facilities and train 200+ staff annually in reliable, secure use of enterprise collaboration systems.

IT Help Desk II | Department of Energy (Contractor)

Washington, DC

January 2018- November 2019

- Provided Tier II technical support in a secure federal environment serving 5,000+ users, resolving escalated workstations, operating-systems, application, peripheral, and connectivity issues.
- Diagnosed complex user and endpoint problems through structured troubleshooting, identifying probable causes and determining whether issues could be resolved at Tier II or required escalation.
- Installed, configured, and supported enterprise workstation software and operating-system environments while following established DOE technical and security procedures.
- Imaged and deployed 200+ enterprise workstations, completing system setup and post-deployment checks to support secure, standardized endpoint configurations.

- Implemented McAfee File and Removable Media Protection across enterprise endpoints to strengthen encryption and data-protection controls for removable media.
- Managed 15–25 weekly SolarWinds incidents and service requests, prioritizing workload, documenting technical actions and resolutions, and maintaining SLA performance.
- Maintain workstation and peripheral asset information to support equipment accountability, replacement, deployment, and lifecycle tracking.
- Supported users through technical incidents while following access, security, escalation, and documentation procedures required in a federal enterprise environment.

SELECTED DIGITAL FORENSICS & CYBERSECURITY PROJECTS

M57 Patents Digital Forensic Investigation

- Examined a forensic workstation image and work USB in Autopsy; reviewed email, browsing, keyword, Windows user-activity, and removable-media artifacts. Verified evidence integrity with FTK Imager and documented methodology and findings in a formal forensic report.

Security Log & Network Analysis

- Analyzed web and authentication logs with Splunk and Linux CLI to identify anomalous activity and security-relevant patterns; created alert logic for after-hours activity and repeated HTTP 403 events and examined network traffic with Wireshark.

Forensic Imaging & Threat Intelligence

- Performed forensic acquisition, cryptographic hash verification, evidence handling, and chain-of-custody documentation; applied MISP concepts to IOC collection, correlation, and investigative context.

EDUCATION & CERTIFICATIONS

M.S., Digital Forensics & Cybersecurity — University of Maryland Global Campus | Expected May 2027

B.S., Information Technology — Towson University
